

Dear GEC Attendee,

Thank you for participating in the 2021 GEC meeting. The meeting is fully virtual this year. The virtual platform build by Pixel where the meeting will be held is found at: <https://apsgec2021.ispresenting.live>

The platform works best with the latest version of Google Chrome, Microsoft Edge, or Mozilla Firefox. One of these browsers is strongly recommended. You will use your APS login information for the virtual platform.

Registration

To attend the 2021 GEC, you must register for the meeting. There is no late registration cost anymore as the meeting is virtual. The registration information and costs can be found at: <https://www.apsgec.org/gec2021/registration.php>

Virtual Platform Training Materials

To help prepare everyone for the meeting and provide a smooth experience, Pixel has created training materials for attendees, presenters, and session chairs. Please review these prior to the meeting. There are both videos and pdf documents. The training materials can be found on the 2021 GEC website at: http://www.apsgec.org/gec2021/presenter_instructions.php

Oral Presenters and Session Chairs

There are four ready rooms for the concurrent oral presentation sessions. Please go to the backstage ready room at least 10 minutes prior to your session. There will be a live technician in the ready room who can assist you to check that your camera, microphone, and slides are working properly and answer questions. The technician will then send you to the oral session. The oral presentations are done using Zoom and livestreamed to the platform website. To avoid audio feedback, please mute or close the platform website while you have Zoom open.

The backstage ready room page can be found from either the platform main welcome page, or from the menu in the upper right.

On the backstage page, there is a short video that explains the oral presentation process and Zoom. You can then search for your session by typing the session title or your name into the search bar. Or if you know which room (1, 2, 3, or 4) you need to go, you can click the associated backstage button directly. Session chairs will also use Slido in a web browser to monitor the Q&A during the session. The Slido link will be provided in the ready room.

 2021 APS Gaseous Electronics Conference

Backstage Rooms for Oral Sessions

Welcome to the 2021 GEC Conference! This year's event is fully virtual and can be accessed via the platform at <https://apspec2021.ispresenting.live>

When accessing the platform please use the latest version of Google Chrome, Microsoft Edge, or Mozilla Firefox.

These instructions are for the Remote Technical Session Presenters.

02:49

These links are for Oral Presenters & Session Chairs only

If you're **not an oral presenter or session chair** and are here to watch a presentation, please go to the [Meeting Rooms Page](#) or look over the [Schedule](#).

Otherwise, choose your room below to go backstage.

Find My Room

You can use this search to find your room. Your query will be matched against session/presentation titles, presenters, and session chairs Please ensure that the title listed in the search results is the same as the title of your presentation or session before entering the backstage for that room.

Poster Presenters

All poster PDFs should have been uploaded. You can also upload a pre-recorded video to go with the PDF. All poster presenters are expected to be present during the poster sessions and available for live discussion.

To access the posters, use the poster session link from the menu in the upper right.

That will take you to the poster session page where all posters and any pre-recorded videos are available for viewing throughout the conference as shown below.

After clicking “VIEW POSTER”, you will be taken to that poster’s page which will show the PDF document on the left, the pre-recorded video (if uploaded), and a message box to leave questions and messages for the poster presenter which they can see and answer any time.

The screenshot shows a poster page for the 74th Annual Gaseous Electronics Conference (GEC). The poster title is "In-situ detection of plasma emission using in-vacuum active optical sensor" with ID GT61.00025. The presenter is Osamu Sakai, with co-authors Keiji Sakurai and Shigeyuki Miyagi. The poster includes a photo of Osamu Sakai and his affiliation: Department of Electronic Systems Engineering, The University of Shiga Prefecture, Japan. It also mentions his role at the Regional ICT Research Center for Human, Industry and Future. On the right side of the poster, there is a video player showing a pre-recorded video of the presenter. Below the video player, there is a section for "1 ONLINE" and a "Sort By Latest" dropdown menu. At the bottom, there is a text input field for "Ask a question or add a comment...".

During the two poster sessions on Tuesday and Wednesday, an additional “JOIN LIVE” button will become available both from the main poster listing page, and each individual poster page. Clicking either of these will take you to a video meeting with the presenter and any other attendees current in that poster discussion.

The screenshot shows a poster listing page for the 74th Annual Gaseous Electronics Conference. The poster title is "Supersonic Hybrid Non-equilibrium Plasma Reactor for Co-Production of Hydrogen and Value-Added Solid Carbons from Methane" by Andrey Starikovskiy. The poster is currently in a "LIVE" state, indicated by a green "JOIN LIVE" button. Other buttons visible are "VIEW POSTER" and "FAVORITE". Below the poster title, there is a "Details" link. At the bottom of the page, there is a green banner that says "This Poster Session is live. Join now!".

Best regards,
GEC Executive Committee
